TANMAY PANDEY

SOFTWARE ENGINEER | FULL-STACK DEVELOPER | AI & CYBERSECURITY

Bhopal, Madhya Pradesh, India | +91 6266770991 | tpteck8952@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

B.Tech Computer Science (Cyber Security) student with hands-on experience across frontend/full-stack engineering, AI systems, cybersecurity and automation. Six months of paid React development experience at Star Chain Labs, plus practical training in networking, Kali Linux, cybersecurity and data analytics. Builds production-oriented web applications, local-LLM systems and security-focused tools using Python, React, Node.js, FastAPI and modern developer tooling.

EXPERIENCE

Star Chain Labs - Frontend React Developer Intern — **6 Months | Paid**

- Developed responsive frontend modules and business interfaces using React.js, JavaScript, HTML, CSS and modern UI architecture.
- Integrated interfaces with backend REST APIs, built reusable components, improved UX and resolved production-level issues.
- Worked across SaaS workflows including CRM, lead management, dashboards, HR processes and internal operations.
- Used Git/GitHub, Vite and deployment workflows in a production-oriented development environment.

NESTA - Networking & AI Program — **1 Month**

- Gained practical exposure to networking fundamentals, system-level technologies and AI workflows connecting software and infrastructure.

SAGE Winter School - Cybersecurity Training — **1 Month**

- Hands-on exposure to Kali Linux, reconnaissance, network analysis, cybersecurity utilities and vulnerability-assessment concepts.

SAGE Summer School - Data Analytics Training — **1 Month**

- Hands-on training in Power BI, SQL and Microsoft Excel for data analysis and reporting workflows.

SELECTED PROJECTS

Santiria Samadhan - AI-Powered Citizen Grievance Platform | React.js | Firebase | AI Verification

- Built a multi-role grievance platform for citizens, officers, administrators and super administrators with lifecycle-based workflows.
- Implemented image uploads plus AI-assisted checks for suspicious/fake imagery, watermark detection, duplicate verification and trust scoring.
- Hackathon-winning project; awarded a ₹25,000 prize according to the project record.

VANI - Voice Activated Neural Interface | Python | FastAPI | React/Tauri | TypeScript | Rust | Ollama | Whisper | OCR

- Developed an offline-first, local-LLM assistant architecture for natural-language control of applications, files and system workflows.
- Integrated multilingual speech interaction, speech-to-text, text-to-speech, OCR, voice authentication and semantic memory components.
- Designed modular agent routing, knowledge/memory graphs and event-driven workflows with a Python backend and desktop UI.

Aura AI - Engineering Intelligence Platform | MERN | LangChain | Vector Search

- Built an engineering-intelligence platform combining codebase understanding, security analysis, workflow automation and developer-focused AI features.
- Implemented vector-embedding workflows for contextual retrieval and logic generation across engineering tasks.

SkillMap - Student Career Operating System | FastAPI | OpenCV | EasyOCR | spaCy

- Built an OCR-driven platform for automatic form filling, information extraction and skill-gap analysis.
- Added internship discovery, mock interviews and AI-assisted interview-integrity checks using computer-vision signals.

MORE PROJECTS

AgriConnect - AI-Powered Agricultural Marketplace | Next.js | React.js | Gemini AI | Twilio

- Built a D2C marketplace connecting farmers with consumers, including voice-first crop listing and low-bandwidth-friendly experiences.
- Integrated mandi-price intelligence and market-guidance workflows to support agricultural commerce.

Smart URL Inspector | Python | Cybersecurity | Web Technologies

- Developed a security-focused URL analysis application for inspecting links and surfacing potentially suspicious or malicious patterns.

Cybersecurity Chatbot | Python | AI | Cybersecurity

- Built an AI chatbot for cybersecurity guidance and explored LLM integration with security-awareness and security workflows.

Developer OS | Automation | Developer Productivity

- Built a productivity-focused development environment concept integrating developer utilities, automation and workflow-management features.

Code Analyzer | Developer Tools | AI-Assisted Analysis

- Developed a code-analysis project focused on understanding source code, identifying issues and supporting developer workflows.

Zetta / Zettas Platform Work | React.js | Frontend Engineering

- Contributed to responsive SaaS-oriented frontend work during the Star Chain Labs engagement, including reusable interface modules and API-connected views.

ADDITIONAL BUILDS

Marketiez - **Web / Brand Experience** - Digital marketing agency website focused on a premium, performance-oriented brand experience.

Valentra - **Web Product** - Modern product/brand web experience built around a polished SaaS-style interface.

Ravenhall - **Web Experience** - Premium marketing website concept emphasizing visual storytelling, motion and responsive interaction.

Sanmarg Hospital - **Web Application** - Healthcare website/platform concept covering appointments, management workflows and patient-facing experiences.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, HTML5, CSS3
Frontend	React.js, Next.js, Tailwind CSS, Vite, Shadcn/UI, Responsive Design
Backend	Node.js, Express.js, FastAPI, REST APIs
Databases	MongoDB, MySQL, Firebase, SQLite, Supabase
AI / LLM	Ollama, Gemini, Groq, Whisper, LangChain, RAG, Local LLM Applications, OCR, TTS/STT
Cybersecurity	Kali Linux, Nmap, Wireshark, Burp Suite, Metasploit, OWASP, Vulnerability Assessment
Tools	Git, GitHub, Docker, Linux, NPM, Vercel, Nginx, Playwright, n8n, VS Code

EDUCATION

Sagar Institute of Research & Technology (SIRT), Bhopal - **2023 - 2027**

B.Tech - Computer Science Engineering (Cyber Security)

- RGPV | CGPA: ~7.0/10
- Class XII - CGBSE: 62% | Class X - CGBSE: 91%

ACHIEVEMENTS & CERTIFICATIONS

- Hackathon Winner - Santiria Samadhan citizen grievance management platform (₹25,000 prize recorded in project profile).
- Selected participant - IDS Demo Day 2026 & Coding Premier League (CPL) 2026 Hackathon.
- Gemini Certified Student - Google for Education.
- Training credentials/exposure: Cyber Security & Kali Linux (SAGE), Power BI & SQL (SAGE), Networking & AI (NESTA).

CORE FOCUS

Full-Stack Engineering | AI Applications | Cybersecurity | Developer Tools | Automation | Product UI
